

HELP US FIGHT AIRCRAFT NOISE

OUR COMMUNITIES ARE BEING DESTROYED BY AIRCRAFT NOISE.

Brisbane Flight Path Community Alliance (BFPCA) is a non-partisan group of locals fighting for the quieter skies we were promised under both the new and legacy runways.

Our goals are simple and can be implemented now:

1. A **Ministerial Directive** ordering Brisbane's airspace to be redesigned to protect all.
2. A Brisbane **curfew** and flight number cap like at Australia's busiest airport, Sydney.
3. An independent **governance body** with teeth that enforces the new rules and holds those responsible to account.

We have had some recent wins, but these do not go far enough. Aircraft noise is still a major problem for thousands in the Brisbane community. **Aircraft noise will only get worse.**

We need you on our team

To keep the successes coming, BFPCA is planning heaps of action in the lead-up to the federal election this year:

Community-led protests

Fundraising

Marketing and media blitz

To win this fight we need everyone suffering from aircraft noise to come out in force and amplify the community's demand for change.

JOIN THE FIGHT

Two independent bodies – the ANO and BAPAF – have now confirmed the truth; Brisbane communities were not told the whole story. We were misled about how bad aircraft noise would truly be.

We're making Brisbane's aircraft noise pollution a major election issue. If you, friends or loved ones are suffering, sign up to our **newsletter** to find out how you can help.
