PEOPLE BEFORE PLANES

JOIN THE FIGHT

Brisbane Flight Path Community Alliance was established by community members and groups negatively impacted by aircraft noise and pollution across the wider Brisbane area. We lead the campaign for better flights paths, a curfew and a flight number cap at Brisbane Airport.

Airservices Australia and Brisbane Airport Corporation are **actively opposing the introduction of noise restrictions**, because the more planes fly over Brisbane, the more money they make.

Their "solution" to the devastating noise pollution this is causing is to "share" it to new suburbs, including yours. BFPCA is fighting for a better solution: net noise reductions through a **curfew** and a **flight cap** just like at Sydney Airport.

Scan the QR code to sign up to our email newsletter and find out how you can get involved and support the movement.
