INFORMED CHOICES

The Queensland Government owns the largest share in Brisbane Airport through QIC, it has amassed \$200 million in the Attracting Aviation Investment Fund, and it takes key responsibility for education, health, and land use planning, which are all negatively affected as a result of Brisbane's flight paths.

We asked each party hoping to win in the 2024 State Election whether they will support Brisbane communities affected by aircraft noise. You can read each party's full response on our website:
